EDUCATION

CARE College of Engineering

Full-time B.E. Computer Science and Engineering

CGPA: 7.93

Tiruchirappalli, India

2023-01-01 - 2027-12-31

EXPERIENCE

VDart | Full Stack Development Intern | Team Leader Tiruchirappalli, India | 2026-06-08 - 2026-07-08

Led Agile development activities, coordinated task allocation, sprint planning, and project progress tracking. Built responsive React modules and REST APIs using Python, Django, and Django REST Framework. Integrated SQL database operations with backend services and contributed to API integration and code reviews. Resolved development issues and coordinated team tasks to support reliable feature delivery.

Greensoft Groups | Web Development Intern Tiruchirappalli, India | 2025-06-15 - 2025-07-15

Created responsive web pages using HTML5 and CSS3. Implemented backend workflows using Python and Django, including URL routing and request handling. Tested and debugged web applications to identify and resolve frontend and backend issues.

SKILLS

Programming Languages: Python, JavaScript, Java
Libraries/Frameworks: React, Django, Django REST Framework, Node.js, Express.js
Tools / Platforms: Git, GitHub, Jenkins, Docker
Databases: PostgreSQL, MySQL, Redis, SQL

PROJECTS / OPEN-SOURCE

Internship Feedback Management System *React, Django REST Framework, Python, PostgreSQL, REST API*

Full-stack feedback platform with email OTP authentication, session access control, REST APIs, time-bound editing, submission tracking, version history, automatic feedback locking, and an administrative dashboard with role-based access, intern management, rating analytics, and Excel-based bulk onboarding.

UPI Wallet API *Node.js, Express.js, PostgreSQL, Redis, JWT*

Built REST APIs for authentication, UPI PIN management, payments, and transaction processing. Implemented JWT authentication, token expiration, and Redis token blacklisting for secure session management. Designed PostgreSQL transaction models and leveraged Redis caching.

E-Commerce Website *React, Django, Python, SQL, REST API*

Full-stack platform with product catalog, search, filtering, cart, checkout, and order management. Designed SQL data models for products, users, carts, and orders. Integrated React components with Django REST APIs for real-time cart calculations and order workflows.

Service Inward Management System *Python, Django, HTML5, CSS3, SQL*

Service management platform with role-based access, staff and organization management, customer and device tracking, service workflows, admin dashboard, PDF invoice generation, and service-history tracking.

CERTIFICATIONS

- AWS Academy Graduate Cloud Foundations
- Modern DevOps Practices: Git, Docker & Jenkins
- Hands-on Problem Solving using Python & Programming
